science

# PSYCHIATRY

**SUNDAY MAY 6 @ 1-4 PM**

**College & Spadina (meet at the North-East corner)**

On May 6, join a global movement for creative change as we occupy the front grounds of Canada's biggest psychiatric institution - the Centre for Addiction and Mental Health (CAMH).

Moral enforcement & social control are an integral part of psychiatry. The "mental health" system is mainly funded by Big Pharma, the transnational drug companies that make and promote brain-damaging psychiatric drugs (antidepressants & anti-anxiety drugs), and boast of billion dollar annual sales and megaprofits. The bottom line is profit, not people. In the name of "mental health" and "the free market", capitalism and psychiatry manufacture and exploit human vulnerabilities and crises, and routinely violate our human rights. Those people most targeted include women, elderly, homeless, people of colour, disabled, Indigenous, and trans people. RESIST this global epidemic of trauma, dehumanization, disempowerment, poverty, unemployment, disease, and death.

Hear from people who are organizing to resist psychiatry! On Sunday May 6 OCCUPY PSYCHIATRY!

As we resist, we honor that this action is happening on occupied Aboriginal land.

**We are part of the 99%**
