22 September 2004

Franklin Raines, CEO  
Fannie Mae  
3900 Wisconsin Avenue, NW  
Washington, DC 20016-2892

Dear Frank,

This is a personal note to you, Frank. Thank you for responding to my previous letters of concern about Pfizer, Inc.'s widely publicized and fraudulent statement that, *"Zoloft is a medicine that helps correct the chemical imbalance of serotonin in the brain."*

Perhaps because of your encouragement, our panel has exchanged several letters with a Pfizer, Inc. representative. Unfortunately, Pfizer, Inc. could not produce evidence.

I have now written to the Pfizer, Inc. board of directors c/o Hank McKinnell. In case that letter to the board, enclosed, does not get to the board members, I would appreciate your bringing this to the attention of board members yourself.

We appreciate that Fannie Mae works with many disability organizations that we also work with. Many people diagnosed with psychiatric disabilities need to some day own their own housing. But Frank, I am not seeing any other way around our calling for a nonviolent and civil protest of Fannie Mae. Why? You lead one organization that is dedicated to helping lower income people succeed economically. But at the same time you lead another organization that is using out-and-out fraud to convince millions of Americans, including youth, to take a drug that can profoundly influence their minds.

Is there no room for dialogue here, first? I appreciate that you are not a scientific expert. But you were not a military or law expert at Harvard at the time you helped lead a protest to wake up that institution. I am telling you there is a major problem with Pfizer, Inc.'s claims. My phone number is 541-345-9106 or cell 541-913-4312.

Sincerely,

David Oaks, Executive Director
