

*MindFreedom International says:*

# BOYCOTT NORMAL!

The American Psychiatric Association is preparing a new version of the “label bible,” *Diagnostic and Statistical Manual*.

APA’s unscientific labels can lead to hopelessness and discrimination.

Meanwhile, so-called “normal behavior” is wrecking the environment of planet Earth. But “normal” won’t make it into *DSM 5*.

Let’s show young people who are on the receiving end of psychiatric abuse that there is hope. *There is “Life After Labels”! There is “Life After Psychiatric Drugs”!*

- Post your story of resistance and recovery from mental health abuse.
- Video your story for YouTube. Tag it "Boycott Normal!" *It gets better for psychiatric survivors, too!*
- Hold street theater to show your “creative maladjustment.” Mad Pride!

MindFreedom calls for peaceful actions now, leading up to Sat., 5 May 2012, and after. That is the day the American Psychiatric Association meets in Philadelphia to rubber stamp *DSM 5*, for global release in 2013.

***No medication without representation!***

***Raise your voices for more non-drug choices!***

***Rethink psychiatry! Boycott normality!***

MindFreedom International is celebrating its 25<sup>th</sup> year as history’s largest independent nonprofit coalition led by survivors of psychiatric human rights violations. All supporters and allies are invited to join and get active, today. MFI is united to win human rights and humane alternatives in the mental health system.
